

East Idaho Regional GIS Meeting

Date: **Sept 16, 2008**

Time: **10:00-12:00**

Host: **Bonneville County**

Place: **Bonneville County Courthouse**

Minutes

Conducting: Bonnie M

Attendees: Bonnie M, Dawn L, Janet C, Rayce R, Eric S, Sherry L, Craig R

- Minutes from August meeting were approved.
- EIRGIS mission statement changed to:

“Our mission is to strengthen Geographic Information Systems in the Eastern Idaho region through regional collaboration to improve the quality and availability of data.”

- Eric Smith – 2009 NAIP – Imagery Partner Outreach
Eric is a volunteer for the Imagery Committee and offered to contact all counties in our region to ask for participation of \$1,000-\$5,000.
Fremont, Bonneville, Jefferson, Teton, have committed to participate and **Eric will contact the other 5 counties and ask them to participate.**
Janet Cheney asked Eric or Craig to attend IAAC Meeting this week and promote Imagery Partner Outreach.
- Craig reported on ‘Cadastral Partnership Invitation’ presented at the Assessor’s Conference in August. GIS Cadastral Leaders are developing support and hope to engage new partners for seamless, accurate, current, easily accessible, standards based, Cadastral Framework layers. Parcel data is critical.

“If we don’t do it, it will be done by others, resulting in loss of control over accuracy, privacy and liability concerns. The time is right for collaborative action.”

Craig will check with Gail Ewart to see if we can link to her power point presentation through eirgis.org so everyone can learn more about this statewide effort.
- Eric Smith was unanimously voted in as ‘Website coordinator’. Eric demonstrated eirgis.org. He went through each tab and explained how they can be updated.
Eric will get confirmation on all contacts that are listed so far. University Place to be added as a contact. Federal/State contacts to be under separate listings. Calendar will have updated agendas and meeting information. Additional ‘links’ were suggested. Projects tab will give information on EIRGIS projects in progress.
- **Rayce will send information from NGS about creating 1 zone (ITM) rather than the 3 zones we currently have.**

- Regional Road Centerline Project- All counties are invited to participate in road project.
 - Phase I:
 - a. **Find out from Frank Roberts if the standards are in place.**
 - b. Create seamless regional county boundary. **Each county assigned to locate their county legal description, map the boundary and create metadata.**
County boundary legal description found at :
<http://www3.state.id.us/idstat/TOC/31001KTOC.html>
 - Phase II:
 - a. Counties need to have road metadata and a way to 'harvest' their county road data.
 - b. Agreement points between counties.
- Rayce suggested looking at ITD-GIS standards by Liza Fox and will send copies to everyone or bring to next meeting.**
- Eric can send out scripts to all counties to save time in getting data to a web accessible folder.**
- **Sherry will use Rayce's suggestion and use Outlook to send Meeting Notification's and recipient can then accept or decline.**
- **Next meeting: October 14, 2008 10:00AM-12:00PM Teton County**
- Please note: Action items are **BOLD**
